INDICATION

Predicts the likelihood of progression to succesful vaginal delivery.

INTERPRETATION

SCORE	INTERPRETATION
≤ 5	Unfavorable cervix. Induction may be necessary for successful vaginal delivery
6-7	Does not definitively predict whether or not induction will be successful. Consider induction or augmentation of labor based on clinical judgment
≥ 8	Spontaneous vaginal delivery is more likely and augmentation or induction may be unnecessary

CALCULATION

Total score = sum of scores for each question

FACTOR		SCORE
Dilation	Closed	0
	1-2cm	1
	3-4cm	2
Effacement	0-30%	0
	40-50%	1
	60-70%	2
	≥80%	3
Station	-3	0
	-2	1
	-1/0	2
	1/2	3
Position	Posterior	0
	Mid-position	1
	Anterior	2
Consistency	Firm	0
	Moderately firm	1
	Soft	2
